

LiquorPOS® Version 5.2 New Features

Upgrades are FREE for LiquorPOS® customers with current support contracts. For details on how the new features function, please see the Help File in your upgrade or online at our Web site, www.liquorpos.com.

- * **Full Touch Screen Capability**—Attractive, simple interface gives you true touch screen capability at the point-of-sale. Compatible with both serial and USB touch screen monitors.
- * **PCI/PA-DSS Compliant**—Now fully compliant with all VISA mandates regarding credit card encryption and security which take effect July 2010.
- * **Enhanced Receipts with Custom Graphics**—Print attractive receipts with your store's logo at the top.
- * **Automatic/Online Updates**—Receive all updates to your software automatically if your computer is on the Internet.
- * **Windows 7 Compatible**—LiquorPOS Version 5.2 is fully compatible with the new Windows 7 Professional operating system. Of course, the software still runs under Windows XP Pro as well.
- * **Add up to 50 Departments**—Create up to 50 departments instead of just the original ten. Tailor inventory management to even more closely match your store's needs.
- * **Ten Available Price Levels**—Our multiple price level feature has been beefed up to add seven more available price levels. Customize special pricing for customers and employees.
- * **Multiple Vendors per Item**—For products with multiple vendors, attach multiple vendors and track purchase history and next-cost pricing from each.
- * **Customer by Product Report**—Print a report detailing which customers bought a specific product, a type of product or products within a department.
- * **Enhanced Delivery Module**—Major changes to delivery module give separate bill-to and ship-to addresses and extensive fields for notes/directions. These notes can be saved to automatically print for subsequent deliveries.
- * **Auto Detect Credit Card Tender**—Just swipe your customer's credit card once all items are on the sales screen and the system will automatically detect the type of credit card, tender the sale and print a receipt.

- * **Customer and Employee Labels**—Design and print labels for your customers and employees directly from the software.
- * **Finance Charges**—Charge and track finance charges due from customers with overdue invoices. You set the percentage rate and determine when an invoice is considered overdue.
- * **Multiple Day Closeouts**—Forget to run your end-of-day? Away for a few days? Now you can separate sales contained in a single close-out according to date.
- * **Reprint Drawers Closing**—If you forgot to print a drawer closing report, you can now retrieve and reprint this important report.
- * **Reprint Receiving Sessions**—Reprint a receiving report that failed to print.
- * **Transfer Accounts**—Transfer goods between your stores at cost, at zero price, however you would like to without including the transfer in sales. Each store in your group can now transfer products in and out.
- * **Two-Line Pole Display**—Now display a two-line message for your customers on your customer pole display.
- * **Customer Monitors**—LiquorPOS now supports dual monitors and a split-display for advertising.
- * **Drivers License Scan Analysis**—Print a report detailing drivers licenses scanned with your end-of-day.
- * **Enhanced Frequent Buyer Program**—Gives you more control over how your customers accumulate and redeem points.
- * **Gratuities**—New tip feature to add a gratuity to sales at wine tastings and other events. Tips are tracked separately from sales.
- * **Review Adjustments Posted to Customer Accounts**—Print a report detailing adjustments posted to house accounts.
